

Bineta DABO

Full-Stack / Backend Developer

Tivaouane, Senegal • +221 78 534 91 99 • binetadabo28@gmail.com • bineta354.github.io • github.com/Bineta354 • linkedin.com/in/bineta-dabo

Full-stack developer specialised in PostgreSQL / Supabase / Node.js backends and multi-tenant systems. Experience with production platforms: port logistics, a very high-traffic event, healthcare. Role-based security (Row Level Security), realtime, load testing. Master's in Distributed Information Systems; award-winning publication at COC'2026.

PROFESSIONAL EXPERIENCE

- Full-Stack Developer** · IAI Compétences, Dakar

Apr. 2026 – present

 - Logistics platform (Node.js / Express / PostgreSQL) for a port operator in Dakar: multi-client price lists, partial-departure statuses, role-based notification filtering.
 - Fixed critical production bugs: cascading 503 errors, theoretical stock recalculation, 500 errors on the orders API, bulk product import.
 - Multi-clinic medical platform (React/Vite, Supabase): multi-tenant isolation with Row Level Security; ~100 SQL tables, most active contributor (~83 commits).
- Backend Developer — Mawlid, Pilgrim Guide (Gamou de Tivaouane, CEZAT)**

2026

 - Backend developer of the team on the official mobile/web app (Flutter, React/Vite): PostgreSQL schema, migrations, RPC functions, Supabase Edge Functions.
 - App published on the App Store and Google Play: map, incident reporting, digital library, MP3 player, live follow-up, AI assistant.
 - Role-based security policy (RLS), authentication, realtime notifications.
 - Load testing (k6 Cloud) and production incident handling ahead of a high-traffic event.
- Freelance Web Developer** · Etech Energie

Feb. 2026 – present

 - Design and development of the company website.
- QA Tester (3-month internship)** · SecurAxe SUARL, Dakar

Jun – Aug 2026

 - Functional testing of the Archiva web platform and the Kaaysign mobile app.

PROJECTS

- Multi-agent Cloud resource allocation system** · Python · SPADE · asyncio

2025

 - Published on HAL (hal.science/hal-05571848), 1st prize at COC'2026. Master's thesis graded 16/20.
- Asamaan — the weather and starry sky from where you are** · Expo · React Native · TypeScript

2026

 - Personal mobile app (local weather, sky map, bulletin, notifications); Google Play release in preparation.

EDUCATION

- Master's (M2) Computer Science — Distributed Information Systems** · UCAD, Dakar

2023–2025 · defended Jul. 2025
- Master's (M1) Computer Science** · UCAD, Dakar

2022–2023
- Bachelor's (L3) Computer Science** · UCAD, Dakar

2021–2022
- BTS Industrial Computing & Networks** · CFPT Senegal-Japan, Dakar

2020–2021

TECHNICAL SKILLS

- Backend:** Node.js / Express, Supabase (Auth, RPC, Edge Functions, Realtime, Storage), Java / Spring Boot, ASP.NET Core, Laravel, PHP
- Frontend & mobile:** React 18/19, Vite, Next.js, Tailwind CSS, Three.js / R3F, Recharts, FullCalendar, Bootstrap, Flutter, Expo / React Native
- Databases:** PostgreSQL, MySQL, MongoDB, Couchbase, Oracle, SQL Server
- Cloud & infra:** AWS (EC2, S3, VPC), OpenStack, CloudSim, Docker, Vercel, Linux, Bash, networking (TCP/IP, DNS, DHCP, routing)
- Data & AI:** Python, NumPy, Pandas, R, Machine Learning, Deep Learning, multi-agent systems (SPADE)
- Tools & methods:** Git / GitHub, CI/CD (Jenkins, GitLab CI), k6, Jira, Trello, ClickUp, UML, BPMN, Scrum

CERTIFICATIONS

AfriConnect+ / Erasmus+ (2025–2026): IoT security (TLS/DTLS, VPN), embedded systems and industrial IoT, LoRaWAN, FreeRTOS on STM32L4, data mining and AI, IoT data analysis with R, PCB design in KiCad.
