

Bineta DABO

Researcher in Distributed Systems & Cloud Computing — PhD application

Dakar, Senegal • +221 78 534 91 99 • binetadabo28@gmail.com • bineta354.github.io • github.com/Bineta354 • linkedin.com/in/bineta-dabo

Master's graduate in Distributed Information Systems (UCAD, with honours), author of a thesis on multi-agent Cloud resource allocation, published on HAL and awarded 1st prize at the international conference COC'2026. Hands-on experience with multi-tenant distributed systems under strong consistency and scalability constraints. Interests: fairness and efficiency of distributed resource allocation, multi-agent systems, Cloud Computing.

RESEARCH & ACADEMIC PROJECTS

Multi-agent model for fair Cloud resource allocation · Master's thesis, UCAD *Defended Jul. 2025 · 16/20*

- Multi-agent system (Python, SPADE, asyncio): client, resource, load-balancing and monitoring agents; monitoring dashboard.
- HRRN priority with aging (anti-starvation) and topological-sort scheduling (Kahn's algorithm): fairness and respect of task dependencies.
- Published on HAL (hal.science/hal-05571848) · 1st prize at the international conference COC'2026.

Cloud Computing — AWS, OpenStack & CloudSim · Master 2 SIR, UCAD

- Bash / Java (AWS SDK) automation of an AWS VPC; CloudSim simulations (200 to 1000 requests): impact of the number of VMs on response time.

PROFESSIONAL EXPERIENCE

Full-Stack Developer · IAI Compétences, Dakar *Apr. 2026 – present*

- CSL (Node.js / Express / PostgreSQL) for the Port Autonome de Dakar; fixed critical bugs (cascading 503s, stock recalculation, orders API).
- Multi-clinic medical platform (React/Vite, Supabase): multi-tenant isolation with Row Level Security; ~100 SQL tables, ~83 commits.

Backend Developer — Mawlid, Pilgrim Guide (Gamou de Tivaouane, CEZAT) *2026*

- Sole backend developer of the official app: PostgreSQL, RPC, Edge Functions, role-based security (RLS), realtime; k6 Cloud load testing and production incidents.

Freelance Web Developer · Etech Energie *Feb. 2026 – present*

- Design and development of the company website.

QA Tester (3-month internship) · SecurAxe SUARL, Dakar *Jun – Aug 2026*

- Functional testing of the Archiva web platform and the Kaaysign mobile app.

EDUCATION

Master's (M2) Computer Science — Distributed Information Systems · UCAD, Dakar *2023–2025 · defended Jul. 2025 · With honours*

Master's (M1) Computer Science · UCAD, Dakar *2022–2023*

Bachelor's (L3) Computer Science · UCAD, Dakar *2021–2022*

BTS Industrial Computing & Networks · CFPT Senegal-Japan, Dakar *2020–2021*

TECHNICAL SKILLS

Backend: Node.js / Express, Supabase (Auth, RPC, Edge Functions, Realtime, Storage), Java / Spring Boot, ASP.NET Core, Laravel, PHP

Frontend & mobile: React 18/19, Vite, Next.js, Tailwind CSS, Three.js / R3F, Recharts, FullCalendar, Bootstrap, Flutter, Expo / React Native

Databases: PostgreSQL, MySQL, MongoDB, Couchbase, Oracle, SQL Server

Cloud & infra: AWS (EC2, S3, VPC), OpenStack, CloudSim, Docker, Vercel, Linux, Bash, networking (TCP/IP, DNS, DHCP, routing)

Data & AI: Python, NumPy, Pandas, R, Machine Learning, Deep Learning, multi-agent systems (SPADE)

Tools & methods: Git / GitHub, CI/CD (Jenkins, GitLab CI), k6, Jira, Trello, ClickUp, UML, BPMN, Scrum

CERTIFICATIONS

AfriConnect+ / Erasmus+ (2025–2026): IoT security (TLS/DTLS, VPN), embedded systems and industrial IoT, LoRaWAN, FreeRTOS on STM32L4, data mining and AI, IoT data analysis with R, PCB design in KiCad.
